Risk of delayed evacuation of the building due to Covid 19 changes within school.	4	5	20	<p>Schools to reconsider and rewrite evacuation policy (if required)</p> <p>Within the first week of pupils returning schools, practice fire drills to take place.</p> <p>Pupils, where possible, to congregate at muster points observing social distance.</p>	<ul style="list-style-type: none"> Exit routes altered where necessary Muster points re-organised and staff informed Ensure fire wardens and all staff know of any changes to procedures and are updated daily through staff briefings Fire drill first week of opening in September – feedback to staff & pupils immediately 	2	5	10
Risk of Health and Safety breach in areas or schools closed for periods of time due to Covid 19.	3	5	15	<p>Check that all usual building checks have been completed and are up to date.</p>	<ul style="list-style-type: none"> Site facilities officer to be updated regularly with H/S guidance HT & SFO site meeting week prior to re-opening in September 	2	5	10
Risk of staff, children and any visitors not adhering to procedures	4	5	20	<p>Ensure all staff have seen and understood COVID risk assessment</p> <p>Place adequate signage is displayed around school for staff, parents and children to adhere to.</p>	<ul style="list-style-type: none"> Procedures shared with staff, children and parents before re-opening in September (staff & parents) or first day back (chdn) Risk assessment published on website and parents signposted Staff on duty and visible at drop-off/pick up times 	2	5	10

Identification of risks

The Risk Management Standard states that risk identification should be approached in a methodical way to ensure that all significant activities have been identified and all the risks flowing from these activities have been defined.

Evaluation of risks

The Risk Management Standard states that risks should be evaluated against agreed criteria to make decisions about the significance of risks. The Trust uses a 5 x 5 Matrix to assess impact and probability as high to low, as illustrated in the diagram below: With 5 x 5 having High Impact and High Probability (see appendix section 2 and 3)

Score	Probability	Impact
1	Remote	Insignificant
2	Unlikely	Minor
3	Possible	Moderate
4	Likely	Serious
5	Certainty	Catastrophic

For example - A hazard such as an insecure school entrance would be judged as Likely (4) this would result in undesirable visitors entering the site with potentially Catastrophic consequence (5) thus resulting in a score before measures have been introduced of $4 \times 5 = 20$. Following measures being implemented this is reduced to Remote (1) probability. The impact however still remains Catastrophic (5) and so the overall score reduces to $1 \times 5 = 5$.

Risk appetite

The term risk appetite describes the Trust's readiness to accept risks and those risks it would seek to reduce. The Trust's risk threshold is the boundary delineated by the red shaded area (represented by scores of 5 and above with scores 15 and above requiring immediate attention) in the risk matrix in paragraph 3.3. Above this threshold, the Trust will actively seek to manage risks and will prioritise time and resources to reducing, avoiding or mitigating these risks.

Addressing risks

When responding to risks, the Trust will seek to ensure that it is managed and does not develop into an issue where the potential threat materialises.

The Trust will adopt one of the 3 risk responses outlined below:

- Assume Treated (or Mitigate) Counter measures are put in place that will either stop a problem or threat occurring or prevent it from having an impact on the business Or the response actions either reduce the likelihood of a risk developing, or limit the impact on the Trust to acceptable levels.
- Treat (Transfer) The risk is transferred to a third party, for example through an insurance policy.
- Tolerate We accept the possibility that the event might occur, for example because the cost of the counter measures will outweigh the possible downside, or we believe there is only a remote probability of the event occurring.

Catastrophic	5	10	15	20	25
Serious	4	8	12	16	20
Moderate	3	6	9	12	15
Minor	2	4	6	8	10
Insignificant	1	2	3	4	5
	Remote	Unlikely	Possible	Likely	Certainty
